What's New?

Find out about the changes that are coming soon to iConnect

What's New?

Did you know you can submit feedback straight from the app?

Just look for the **'Give Feedback'** button on the menu

Framework Settings

a new, improved process

Several performance and usability updates have been made to the 'Framework Settings' area.

This includes a visible button to Enable / Disable frameworks.

Enable

Disable

Just navigate to Settings in the main menu and you will be able to Enable or Disable each framework under 'Available Frameworks'.

Assign Frameworks to Specific Sites

Due to popular demand, we've made it possible to assign each framework to specific sites!

Now, when you enable a framework you will also be able to choose which of your sites can access that framework.

Please note that on upgrade to 2.20, by default, all frameworks currently enabled will be assigned to all active sites.
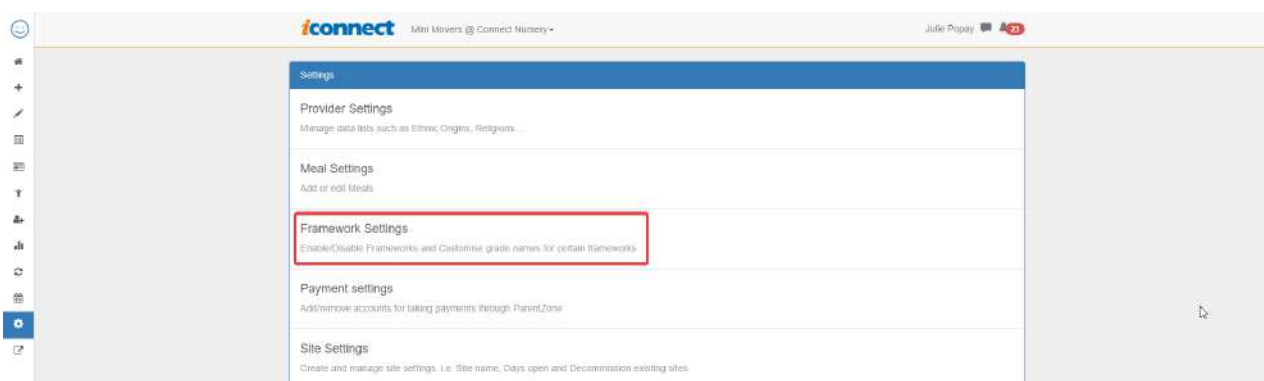

Early Years Foundation Stage

Assign Sites

Grading Text

Grading Colour

To assign/unassign* frameworks to specific sites, go to Settings from the main menu and then click on 'Framework Settings'.

Assign Frameworks to Specific Sites

To assign the framework to a site simply select the framework header displayed, based on the framework selected, you will now see the following options:

- Assign Sites
- Grading Text (if applicable)
- Grading Colour (if applicable)

Please note: in order to access Framework Settings you will require permission to 'Edit Configuration' in iConnect.

Assign Frameworks to Specific Sites

When 'Assign Sites' is selected, you will see a **Search** field, **Select all** button, **Deselect all** button and a list of your active sites. To assign the framework to a site, simply select the site name and click 'Save'.

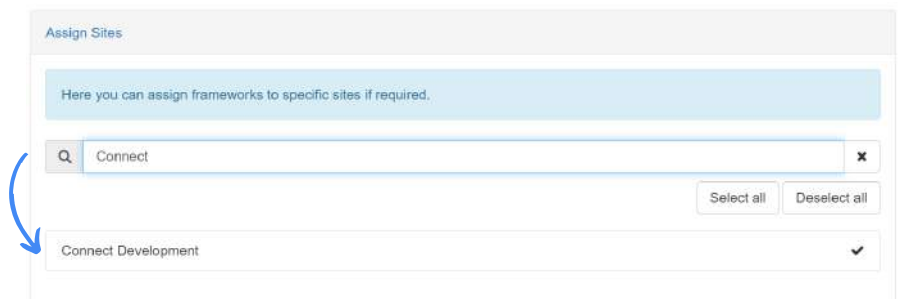

Pro tip!

If you have a large number of sites and a framework is only relevant to a few, deselect all sites and use the search facility to find the relevant sites and then select them to ensure they are ticked.

Bug Fixes

Development Tracking Overview

Resolved an issue that was causing an error when accessing the Development Tracking Overview.

Statement Count Report

An issue has been fixed which resulted in incorrect totals being displayed on the Statement Count Report.
